

What a crazy time – especially as we move into a new set of restrictions across Victoria.

Never has the idea of community been so tested; with on-line learning, remote working and lots of zooming – we are all being challenged in our own way and unified by this new experience.

At Move-in, we specialise in creating community spaces – including **student accommodation, co-living, co-working, hotels and serviced apartments, communal and public spaces, senior living, and build-to-rent**. It keeps us thinking about what it means to be together; how to share environments with one another even when we need to keep physically separate.

As we navigate this ‘new normal’, we continue to strive to create successful community environments through our FF&E. Here’s a little bit of what we have been up to.

Stay safe everyone. Stay home & wash your hands!

West Side Place

Welcome to West Side Place – Melbourne's newest luxury residential tower & home to the Ritz Carlton.

We collaborated with Far East Consortium & Cottey Parker architects to deliver FF&E and styling for all of the communal spaces and the settlement suite for Stage 1. We can't wait to get started on Stage 2.

Thanks to the team and to *Tess Kelly* for taking such great photographs.

Meet Clikclax™

You may have seen our fabulous pink posters plastered around town and wondered – what is this amazing thing?

Say hello to **Clikclax™** – the original physical distancing system. Not your average sneeze guard, **Clikclax™** is a fun and flexible desktop screening system based on the 70's classic cult toy. Imagined and made in Melbourne, it comes in a range of colours and can be configured to suit any space of any size. No tools required – just opposable thumbs.

Pre-order your **Clikclax™** kit now and be ready to get back to work...when the time comes...

Co-living and Build-to-Rent vSummit

The **Urban Developer's** recent vSummit gathered some of the most interesting minds to discuss the subject of 'Community Living.'

Move-in Director, *Zahava Elenberg*, joined the panel to discuss 'Human Behaviour in Buildings: The data, lessons and learning from co-living' with *Samuel Vetrak* from Bonard, *Christian Schmitz* from Salto Systems and *Tom Welsby* from Resvu, moderated by *Adam Di Marco*.

Sarah Olukhale

Move-in General Manager & Interior Designer

We love Student Accommodation at **Move-in** and I personally relish the opportunity to collaborate with our clients to create fun and interesting spaces within our projects.

Student accommodation today is about building and nurturing a sense of community within the co spaces. I love being able to focus on FF&E alone as it allows us to fully conceptualise these areas.

I am currently putting the final touches on our latest project with Citiplan. Stay tuned.
